Summary

Fullstack Developer with 5+ years of experience creating dynamic interfaces and scalable web applications. Specialized in MERN and Frontend. I actively incorporate artificial intelligence tools (OpenCode, Claude) to accelerate development, automate repetitive tasks, and improve code quality, achieving significant increases in personal and team productivity.

Experience

Freelance Fullstack Developer

Mar 2024 – Feb 2026

- Development of web applications with Next.js, Vite, and TypeScript, ranging from SEO-friendly landing pages to complex applications with SSR and static generation.
- Implementation of high-fidelity responsive designs from Figma prototypes using TailwindCSS.
- Modernization of legacy projects through technology migration, refactoring, and critical bug fixing using AI assistants (OpenCode, Claude).
- Integration of REST APIs and state management with Zustand and React Query.
- Use of OpenAI API to generate automatic documentation, suggest optimizations, and create mock data in development environments.

Software Developer

Seven Suite / Dec 2022 – Mar 2024

- Led the development of a Dashboard for analytical data visualization with real-time interactive graphics.
- Built an internal library of reusable components with TypeScript, TailwindCSS, accelerating the creation of new features.
- Optimized performance by reducing initial load time by 30% through code-splitting, lazy loading, and component optimization.
- Integrated TDD and AI workflows (Copilot, ChatGPT) for automatic snippet generation and code review, reducing repetitive tasks by 20%.

React.js Developer

Alliance Tech Solutions CR / Apr 2021 – Jul 2022

- Increased web application efficiency by optimizing component rendering, achieving a 25% reduction in load times.
- Developed over 20 reusable components that were integrated into multiple web application modules, reducing code duplication.
- Created unit tests with Jest and React Testing Library.

Process Control Specialist

DIRECTV / Jan 2013 – May 2018

- Automated key processes by creating macros and forms in Visual Basic, reducing data processing times by 40%.
- Managed the personnel management system through the intranet, ensuring data integrity and security for over 500 employees.

Technical Skills

- | | |
|--|---|
| • Frontend: React, Next.js, Remix, Vite, TypeScript, JavaScript | • Mobile: React Native, Expo |
| • Styling: Tailwind CSS, Material UI, Styled Components, ShadCN, Daisy UI | • State Management: Redux, Zustand, React Query |
| • Animation: Framer Motion, GSAP | • Tools: Git, Github, Figma, Vercel, Postman, JIRA (Agile Methodologies) |
| • Backend: Node/Express, Python/Django | • Testing: Jest, RTL, TDD |
| • Databases: MongoDB, SQL/MySQL | • AI: OpenCode, Claude, Cursor, Copilot |
| | • CMS: WordPress, Elementor |

Education

Técnico Superior Informática

University Institute of Management and Technology – Caracas, Venezuela, 2015-2018

High School Diploma

Instituto Independencia – Caracas, Venezuela, 2000-2005

Languages

Spanish (Native) | English (B2) | Italian (C1)
